

times, since it may not be generally known that the sudden reaction in the gold market was mainly due to a report from a certain party in Montevideo, to the effect that O'Connell would consent to no treaty that did not admit for arbitration all territory up to the Rio Negro territory. A more intemperate and unjustifiable assertion, coming from the quarters it did, could not be imagined, and the whole affair, since it is now completely cleared away by facts, has been a very good lesson to all what little trust can be put in the parties who would willingly deceive the public.

It is known now on the very best

REVIEW FOR EUROPE

The latest advices from the West
Coast announce that at last the
Chilian Commander in Lima has
succeeded in establishing a Provi-
sional Peruvian Government, and it
is probable that soon terms of
peace will be arrived at, although
Pierola is still in the mountains
and threatens to maintain a "guer-
rilla" war, which may contribute to
extend the misfortunes of his coun-
try.

The sooner he retires from
the scene, and Peru makes peace
with Chile, the better. As for Bo-
livia, we have intermittent news of
war and peace from that quarter,
which really amounts to so little
that no one here cares much what
attitude she assumes, our chief at-
tention being confined to the con-
stant arrival of bar silver, which
we are shipping as fast as we can
from Rosario. Despatches written
by the Peruvian Minister in this
city to his Government have been
taken by the Chilians, and immense
importance was at the moment at-
tached to them, as likely to show
up the secret Argentine policy

A photograph of a book's fore-edge and spine. The left side shows the fore-edge of a light-colored, aged paper block with some faint, illegible text visible. The right side shows the spine, which is covered in a dark blue, textured material, possibly leather or cloth, with a vertical crease or seam visible.

BY STEAMER UP
O NEGRO.

(From an occasional Contributor)

Hotel del Progreso, Mercedes,
B. Oriental, Feb. 28th.

I dip my pen in the Rio Negro just to say a few things about this nice place, which, as you are aware, has been the resort of invalids for many years from both Montevideo and Buenos Aires. The Hotel from whence this misle flies is within half a square of this charming river whose peaceful bosom and flowing stream remind of bygone fishing on the lovely river Shannon. My host and his wife (Basques) evince every desire to make their visitors comfortable, and devote special attention to cleanliness and daily use of good plain food, their charge is exceedingly moderate, being one and a half patacon daily, which includes board, lodging, and daily use of bath, warm and cold, in the hotel, of water drawn by machinery direct from the adjoining Rio Negro, of whose salubrious qualities, I will presently speak. The splendid steamer Cosmos, of whose unrivaled build and accommodation it is need less to speak, having been made known in your columns, arrived at the Jaquiri or mouth of Rio Negro after about eight hours run from B. Ayres, being somewhat over 12 miles per hour against stream and tide; after transfer of passengers, their luggage, and some cargo to the small steamer Cosmo, we followed the windings and labyrinth of the picturesque Rio Negro till we reached our destination about half an hour before midnight, having made the trip from Rio Uruguay to Mercedes in about four hours; but unfortunately, owing to the darkness of the night the charms of its pleasant scenery were lost to sight, but, however, on the return trip, which always takes place between the hours of 2 and six o'clock p.m., we shall be compensated for the momentary loss. You will thus see that this agreeable bathing place can be reached by a most delightful water excursion of about 13 hours from B. Ayres, with only one change of steamer as above explained. Owing to want of proper port regulations we were denied the luxury of a night-shirt, as our luggage was deemed to return on board till next morning, to be dispatched by the Customs employe, the only part of my baggage I was allowed to carry off being a walking stick, which certainly proved of friendly service in helping me through the rugged streets by the aid of dimly lighted kerosene lamps, which have not yet been supplanted by the more brilliant and genial gas lamp. Now for the question of the hygienic properties of the Rio Negro water. I am not a doctor, and therefore cannot speak with official or professional authority, yet meeting with a Spanish medical man, (Dr. Blanes), resident here for years, on board the steamer, I had an opportunity to question him on this all important point, connected with which I had an opportunity of an interview last night with the popular and well known doctor Rivas, who has been living here for nearly thirty years and is probably the only medical man who has made efforts to have the water analysed and its hygienic properties established. From these sources I gathered the following items of evidence to confirm last conclusion.

1st. That inundations of the Rio Negro have been known to have proved deadly destruction to all exotic vegetable life on its borders.

2nd. That all animals evince a dislike to drinking the water, and will take any other water in preference.

3rd. Consumptive patients are distinctly worsened by living near, drinking or bathing in the waters of the river, thus showing the presence of certain elements distinctive of the river water.

4th. It is a historical fact that Philip III. of Spain in the 18th century, in addressing the authorities of the town of Soriano, situated on the margin of the same river, styled the town as "leal y noble ciudad de Soriano, puerto de Salud, en el Rio Negro" and established the fact that in those remote days the river was known to possess highly distinctive hygienic qualities. Doctor Rivas stated that, owing to imperfect analyses only having been made of the water, only certain elements have been declared to exist but in his opinion leaving yet unperceived other potent properties demonstrated by the effects, which he thinks might be arrived at by the use of the spectroscope.

The absence therefore of any official and complete chemical analysis of the water, as also of a demonstrative statistical record showing the number of diseased and sickly persons who enter and leave this town, cured or uncured, leaves the medical men in Buenos Aires and Montevideo, or other adjoining towns incompetent, to direct their patients as to the expediency of the use of the water, and we are compelled to recur to the experience of bathers, whose joint testimony certainly goes far to establish the healing qualities of the river. I have thus at some length brought together the principal facts of the question still pending, and still undecided, (for the reasons stated above) by scientific

experiment of the medicinal properties of the water.

The market after Carnival and the month's liquidation opened a gloomy picture, prices, however, did not much fluctuate, dropping a trifle in the month; prices for cash laid at 22.20 all day, Cadulus took as going to par, very little of the stock offered in the market, one lot of National Bank Shares was sold at 87.

Dr. Jayne's
ALTERATIVE
This valuable preparation combines all the medicinal virtues of those articles which long experience has proved to possess the most safe and efficient alterative and desolvent properties, procuring for it a world-wide reputation as
THE GREAT PURIFIER OF THE BLOOD AND RENOVATOR OF THE SYSTEM.
Whenever the economy of the life-giving blood has been vitiated, it should be immediately called to help. It drives out pernicious humors, stimulates the absorbent system, restores the disordered organs, reestablishes health and spirit, and brings back the bright color to the pale complexion. Thousands of testimonials establish its importance for curing Scrophulous, King's Evil, Skin and Mercurial diseases, Blisters, Bores, Ulcers, Dropsy and Dropsical Swellings, Enlargement and Ulceration of the Liver, Glands, Glands or Ligaments, Erysipelas, Eczema, Rheumatism and all diseases originating from a depraved and impure state of the blood.

This valuable preparation combines all the medicinal virtues of those articles which long experience has proved to possess the most safe and efficient alterative and desolvent properties, procuring for it a world-wide reputation as
THE GREAT PURIFIER OF THE BLOOD AND RENOVATOR OF THE SYSTEM.
Whenever the economy of the life-giving blood has been vitiated, it should be immediately called to help. It drives out pernicious humors, stimulates the absorbent system, restores the disordered organs, reestablishes health and spirit, and brings back the bright color to the pale complexion. Thousands of testimonials establish its importance for curing Scrophulous, King's Evil, Skin and Mercurial diseases, Blisters, Bores, Ulcers, Dropsy and Dropsical Swellings, Enlargement and Ulceration of the Liver, Glands, Glands or Ligaments, Erysipelas, Eczema, Rheumatism and all diseases originating from a depraved and impure state of the blood.
